

In an ongoing endeavour to excel in teaching programmes for the trainees in Pediatric Surgery a new endeavour namely

"Training Beyond Boundaries" was initiated by Department of Pediatric Surgery from May 2022, under concurrence and intimation to Worthy Dean, MAMC. It is online teaching programme involving faculty members and senior consultants who not only deliver didactic lectures on a given topic but also interact with students on important aspects of patient care and get their doubts clear on that topic. Generally one/two sessions per month are held and lectures stretching over one hour or so. The best faculty members in their fields belonging to anywhere in India / any country in the world/ any sector educates the students pursuing Pediatric surgery and allied specialties, whoever is willing to gain knowledge. The subject coverage ranges from core Pediatric surgery to basics and advances as well as related topics of neonatology, Pediatric trauma, Pediatric cardiology, ventilation, neurosurgery etc. Even undergraduates can share this platform to widen their horizon of learning

The schedule of the programme is available with the department and can be obtained by writing to mamcpedsurg@gmail.com
